Marking Scheme

Mathematics

Ordinary Level

Note to teachers and students on the use of published marking schemes

Marking schemes published by the State Examinations Commission are not intended to be standalone documents. They are an essential resource for examiners who receive training in the correct interpretation and application of the scheme. This training involves, among other things, marking samples of student work and discussing the marks awarded, so as to clarify the correct application of the scheme. The work of examiners is subsequently monitored by Advising Examiners to ensure consistent and accurate application of the marking scheme. This process is overseen by the Chief Examiner, usually assisted by a Chief Advising Examiner. The Chief Examiner is the final authority regarding whether or not the marking scheme has been correctly applied to any piece of candidate work.

Marking schemes are working documents. While a draft marking scheme is prepared in advance of the examination, the scheme is not finalised until examiners have applied it to candidates' work and the feedback from all examiners has been collated and considered in light of the full range of responses of candidates, the overall level of difficulty of the examination and the need to maintain consistency in standards from year to year. This published document contains the finalised scheme, as it was applied to all candidates' work.

In the case of marking schemes that include model solutions or answers, it should be noted that these are not intended to be exhaustive. Variations and alternatives may also be acceptable. Examiners must consider all answers on their merits, and will have consulted with their Advising Examiners when in doubt.

Future Marking Schemes

Assumptions about future marking schemes on the basis of past schemes should be avoided. While the underlying assessment principles remain the same, the details of the marking of a particular type of question may change in the context of the contribution of that question to the overall examination in a given year. The Chief Examiner in any given year has the responsibility to determine how best to ensure the fair and accurate assessment of candidates' work and to ensure consistency in the standard of the assessment from year to year. Accordingly, aspects of the structure, detail and application of the marking scheme for a particular examination are subject to change from one year to the next without notice.

Marking Scheme

Ordinary Level

Paper 1

Structure of the marking scheme

Candidate responses are marked according to different scales, depending on the types of response anticipated. Scales labelled A divide candidate responses into two categories (correct and incorrect). Scales labelled B divide responses into three categories (correct, partially correct, and incorrect), and so on. The scales and the marks that they generate are summarised in this table:

Scale label	B	C	D
No of categories	3	4	5
5-mark scale	0, 3, 5	0, 3, 4, 5	0, 2, 3, 4, 5
10-mark scale	0, 7, 10	0, 4, 6, 10	0, 4, 6, 8, 10
15-mark scale		0, 6, 10, 15	
20-mark scale			0,7,10,15,20

A general descriptor of each point on each scale is given below. More specific directions in relation to interpreting the scales in the context of each question are given in the scheme, where necessary.

Marking scales – level descriptors

B-scales (three categories)

- response of no substantial merit (no credit)
- partially correct response (partial credit)
- correct response (full credit)

C-scales (four categories)

- response of no substantial merit (no credit)
- response with some merit (low partial credit)
- almost correct response (high partial credit)
- correct response (full credit)

D-scales (five categories)

- response of no substantial merit (no credit)
- response with some merit (low partial credit)
- response about half-right (mid partial credit)
- almost correct response (high partial credit)
- correct response (full credit)

In certain cases, typically involving incorrect rounding, omission of units, a misreading that does not oversimplify the work, or an arithmetical error that does not oversimplify the work, a mark that is one mark below the full-credit mark may also be awarded. Such cases are denoted with a * and this level of credit is referred to as *Full Credit -1*. Thus, for example, in Scale 10C, *Full Credit -1* of 9 marks may be awarded.

The only marks that may be awarded for a question are those on the scale below, or *Full Credit -1*.

A rounding penalty is applied each time it occurs in the scheme. There is no penalty for omitted units if the question specifies the unit to be used in the answer, and there is generally no penalty for an omitted euro symbol in questions involving money.

In general, accept a candidate's work in one part of a question for use in subsequent parts of the question, unless this oversimplifies the work involved.

Unless otherwise specified, an answer without sufficient supporting work is generally awarded the lowest non-zero level of credit (typically *Partial Credit* or *Low Partial Credit*, as appropriate).

Summary of mark allocations and scales to be applied

Section A (150)		Section B (150)	
Answer any five questions		Answer any three questions	
Question 1 (30)	Question 4 (30)	Question 7 (50)	Question 9 (50)
(a) 10C	(a)(i)(ii)(iii) 10D	(a)(i) 10B	(a)(i) 10B
(b) 10C	(a)(iv) 5B	(a)(ii) 5B	(a)(ii) 5B
(c) 10C	(b)(i) 10C	(a)(iii) 5C	(a)(iii) 5B
	(b)(ii) 5C	(a)(iv) 10C	(a)(iv) 5C
Question 2 (30)	Question 5 (30)	(b)(i) 10C	(b)(i)(ii) 20D
(a)(i)(ii) 10D	(a)(i) 10B	(b)(ii) 5B	(b)(iii) 5C
(a)(iii) 10C	(a)(ii) 5C	(b)(iii) 5B	
(a)(iv) 5C	(b)(i) 10B		Question 10 (50)
(b) 5B	(b)(ii) 5D	Question 8 (50)	(a)(i) 5B
		(a) 10B	(a)(ii) 5C
Question 3 (30)	Question 6 (30)	(b) 5C	(b)(i)(ii) 10D
(a) 15C	(a)(i) 5B	(c) 5B	(b)(iii) 5C
(b)(i)(ii)(iii) 5D	(a)(ii) 5B	(d) 10C	(c)(i) 5C
(c) 10D	(b) 10C	(e) 10C	(c)(ii) 10C
	(c) 10C	(f) 10C	(c)(iii) 10D

Palette of annotations available to examiners

Symbol	Name	Meaning in the body of the work	Meaning when used in the right margin
✓	Tick	Work of relevance	The work presented in the body of the script merits full credit
✗	Cross	Incorrect work (distinct from an error)	The work presented in the body of the script merits 0 credit
*	Star	Rounding / Unit / Arithmetic error Misreading	
	Horizontal wavy	Error	
P			The work presented in the body of the script merits partial credit
L			The work presented in the body of the script merits low partial credit
M			The work presented in the body of the script merits mid partial credit
H			The work presented in the body of the script merits high partial credit
F*	F star		The work presented in the body of the script merits Full Credit (- 1)
[]	Left Bracket		Another version of this solution is presented elsewhere and it merits equal or higher credit
	Vertical wavy	No work on this page (portion of the page)	
	Oversimplify	The candidate has oversimplified the work	
WOM	Work of Merit	Nothing correct but Work of Merit within the body of work	

Note: Where work of substance is presented in the body of the script, the annotation on the right margin should reflect a combination of annotations in the work

In a **C scale** where * and and appear in the body of the work, then L should be placed in the right margin.

In the case of a **D scale** with the same annotations, M should be placed in the right margin.

A ✓ in the body of the work may sometimes be used to indicate where a portion of the work presented has value and has merited one of the levels of credit described in the marking scheme. The level of credit is then indicated in the right margin.

Detailed marking notes

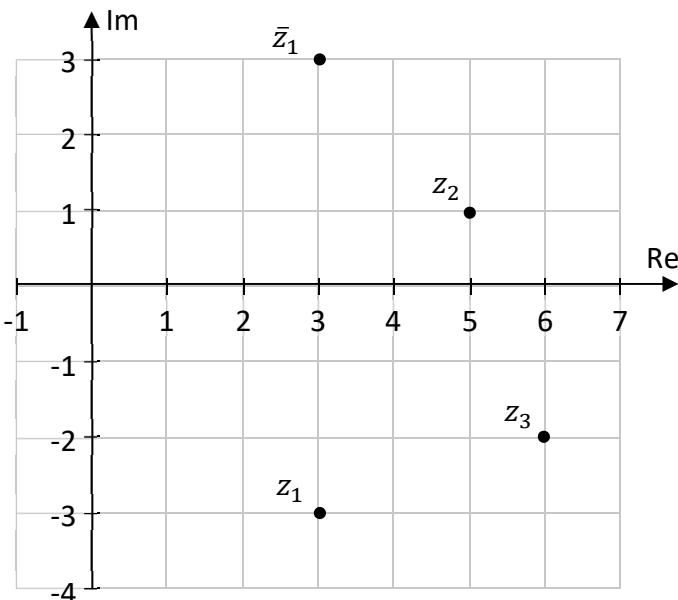

Model Solutions & Marking Notes

Note: The model solutions for each question are not intended to be exhaustive – there may be other correct solutions. Any Examiner unsure of the validity of the approach adopted by a particular candidate to a particular question should contact his / her Advising Examiner.

Q1	Model Solution – 30 Marks	Marking Notes
(a)	$240\ 000 \times 1.08 = [\text{€}]259\ 200$ $259\ 200 \times 1.09 = [\text{€}]282\ 528$	<p>Scale 10C (0, 4, 6, 10)</p> <p>Two steps Involved in solution</p> <p>1. Finds 259 200 2. 1.09 applied correctly to answer for Step 1</p> <p><i>Low Partial Credit</i></p> <ul style="list-style-type: none"> • Work of merit, for example writes 1.08 or 1.09 or $\frac{8}{100}$ or $\frac{9}{100}$ <p><i>High Partial Credit</i></p> <ul style="list-style-type: none"> • One step correct <p>Note: Accept both correct answers without supporting work</p> <p>Note: Full Credit -1 : correct answer without work €282 528</p>
(b)	$\frac{472\ 000 - 460\ 000}{460\ 000} \times 100$ $= \frac{12\ 000}{460\ 000} \times 100 = 2.608 \dots$ $= 2.6\%$	<p>Scale 10C (0, 4, 6, 10)</p> <p><i>Low Partial Credit</i></p> <ul style="list-style-type: none"> • Writes 12000 • Writes $\frac{472\ 000}{460\ 000}$ <p><i>High Partial Credit</i></p> <ul style="list-style-type: none"> • $\frac{472\ 000 - 460\ 000}{460\ 000} \times 100$ or 102.6 <p>Note: Accept correct answer without supporting work for full credit</p> <p>Note: Full Credit -1 : 2.608 without work</p>

Q1	Model Solution – 30 Marks	Marking Notes
(c)	$F = P \left(1 + \frac{r}{100}\right)^t$ $370\,000 = 265\,000 \left(1 + \frac{r}{100}\right)^4$ $1 + \frac{r}{100} = \sqrt[4]{\frac{370\,000}{265\,000}} = 1.08702\dots$ $= 8.7\% \text{ [1 d.p]}$	Scale 10C (0, 4, 6, 10) <i>Low Partial Credit</i> <ul style="list-style-type: none"> Some correct substitution into $F = P \left(1 + \frac{r}{100}\right)^t$ <i>High Partial Credit</i> <ul style="list-style-type: none"> Fully correct substitution <p>Note: Apply F* for incorrect or no rounding</p>

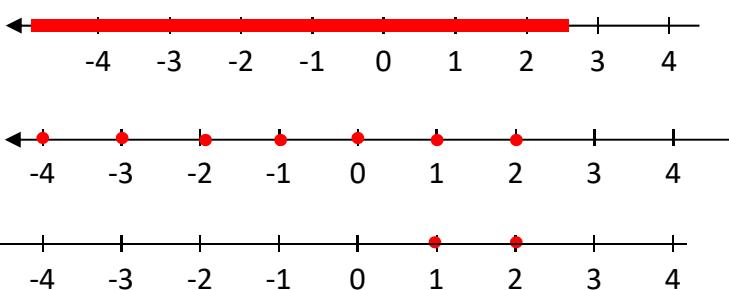

Q2	Model Solution – 30 Marks	Marking Notes
(a) (i) (ii)		<p>Scale 10D (0, 4, 6, 8, 10)</p> <p><i>Low Partial Credit</i></p> <ul style="list-style-type: none"> • Work of merit, for example shows knowledge of conjugate, OR plots one of z_2 or z_3 • Writes \bar{z}_1 only but nothing plotted <p><i>Mid Partial Credit</i></p> <ul style="list-style-type: none"> • Plots \bar{z}_1 • Writes \bar{z}_1 but doesn't plot and plots one of z_2 or z_3 • Plots z_2 and z_3 but doesn't deal with \bar{z}_1 <p><i>High Partial Credit</i></p> <ul style="list-style-type: none"> • Plots \bar{z}_1 and one of z_2 or z_3 <p>Note: Award F* if plots all three points correctly but no or incorrect labels</p>

(a) (iii)	$4(5 + i) - 5(6 - 2i)$ $20 + 4i - 30 + 10i$ $= -10 + 14i$	Scale 10C (0, 4, 6, 10)
		<p><i>Low Partial Credit</i></p> <ul style="list-style-type: none"> • Work of merit, for example , correctly substitutes z_2 or z_3 or does distribution on one of z_2 or z_3 without showing the substitution <p><i>High Partial Credit</i></p> <ul style="list-style-type: none"> • Full substitution and distribution

Q2	Model Solution – 30 Marks	Marking Notes
(a) (iv)	$\sqrt{6^2 + (-2)^2} = \sqrt{40}$ or $2\sqrt{10}$	<p>Scale 5C (0, 3, 4, 5)</p> <p><i>Low Partial Credit</i></p> <ul style="list-style-type: none"> • Writes 6^2 or $(-2)^2$ • Writes $\sqrt{a^2 + b^2}$ <p><i>High Partial Credit</i></p> <ul style="list-style-type: none"> • $\sqrt{6^2 + (-2)^2}$ <p>Note: Accept correct answer without supporting work for full credit</p> <p>Note: Full Credit -1 : 6 · 3 without work</p>
(b)	<p>Ans: z_5</p> <p>Reason: It is the furthest point from the origin</p>	<p>Scale 5B (0, 3, 5)</p> <p><i>Partial Credit</i></p> <ul style="list-style-type: none"> • Correct box ticked • Shows knowledge of meaning of modulus • Joined to origin on diagram • Correctly explains the meaning of modulus but ticks the wrong box <p>Note: Accept z_5 ticked and “furthest” for full credit</p>

Q3	Model Solution – 30 Marks	Marking Notes
(a)	$6x + 12 - 5 = 3$ $x = \frac{-4}{6} \text{ or } \frac{-2}{3}$	Scale 15C (0, 6, 10, 15) <u>Steps</u> 1. Distribution of 3 2. Transposing done 3. Solves <i>Low Partial Credit</i> <ul style="list-style-type: none"> • Work of merit for example one correct operation <i>High Partial Credit</i> <ul style="list-style-type: none"> • Two steps correct
(b) (i) (ii) (iii)		Scale 5D (0, 2, 3, 4, 5) <i>Low Partial Credit</i> <ul style="list-style-type: none"> • Work of merit, for example, shows knowledge of \mathbb{R}, \mathbb{Z}, or \mathbb{N}. <i>Mid Partial Credit</i> <ul style="list-style-type: none"> • One of the three inequalities graphed correctly • Work of merit in 2 or 3 inequalities <i>High Partial Credit</i> <ul style="list-style-type: none"> • Two of the inequalities graphed correctly Note: Accept 0 in (iii) Note: Apply a * the first time \geq is used instead of \leq ; accept it thereafter

Q3	Model Solution – 30 Marks	Marking Notes
(c)	$4x - 4y = -4$ $2x + 4y = 19$ $\Rightarrow 6x = 15 \quad \Rightarrow x = \frac{15}{6} = \frac{5}{2}$ $\frac{5}{2} + 1 = y$ $y = \frac{7}{2}$	<p>Scale 10D (0, 4, 6, 8, 10)</p> <p>Four steps involved in solution.</p> <ol style="list-style-type: none"> 1. Multiplies equation(s) so that 1 variable will cancel / express one variable in terms of the other 2. Produce one equation in one variable 3. Find value of one variable 4. Find value of second variable <p>Note: depending on method, step 3 may be automatically done when step 2 is completed.</p> <p><i>Low Partial Credit</i></p> <ul style="list-style-type: none"> • Some work of merit, for example, relevant work in isolating one variable in one equation, or indicates multiplying one equation by a constant <p><i>Mid Partial Credit</i></p> <ul style="list-style-type: none"> • Two steps correct <p><i>High Partial Credit</i></p> <ul style="list-style-type: none"> • Three steps correct

Q4	Model Solution – 30 Marks	Marking Notes
(a) (i) $g(1 \cdot 5) = 2$ (ii) $x = -2 \cdot 8$ (iii) One root box ticked. Reason: Only cuts x-axis once.		<p>Scale 10D (0, 4, 6, 8, 10)</p> <p>Four items:</p> <ol style="list-style-type: none"> 1. (i) 2. (ii) 3. Correct box ticked 4. Reason <p><i>Low Partial Credit</i></p> <ul style="list-style-type: none"> • One item correct • Work of merit on the diagram <p><i>Mid Partial Credit</i></p> <ul style="list-style-type: none"> • Two items correct <p><i>High Partial Credit</i></p> <ul style="list-style-type: none"> • Three items correct <p>Note: Apply F* if fully correct but no work on graph or incorrect work on graph</p> <p>Note: Tolerance in (ii) $-3 < x < -2 \cdot 5$</p>
(a) (iv)	$\text{Max} (-1 \cdot 6, -1)$ $\text{Min} (0 \cdot 25, -3 \cdot 1)$	<p>Scale 5B (0, 3, 5)</p> <p><i>Partial Credit</i></p> <ul style="list-style-type: none"> • Work of merit, for example, indicated on diagram <p>Note: Tolerance:</p> <p>Max; $-1 \cdot 9 \leq x \leq -1 \cdot 3$, $-1 \cdot 1 \leq y \leq -0 \cdot 9$</p> <p>Min; $0 < x < 0 \cdot 5$, $-3 \cdot 5 \leq y < -3$</p>

Q4	Model Solution – 30 Marks	Marking Notes
(b) (i)	$h'(x) = 3x^2 + 4x - 1$	Scale 10C (0, 4, 6, 10) <i>Low Partial Credit</i> <ul style="list-style-type: none"> • Work of merit, for example writes dy/dx • One term differentiated correctly <i>High Partial Credit</i> <ul style="list-style-type: none"> • Two terms differentiated correctly
(b) (ii)	$h'(2) = 12 + 8 - 1 = 19$ $y - 6 = 19(x - 2)$ <p style="text-align: center;">or</p> $19x - y - 32 = 0$	Scale 5C (0, 3, 4, 5) <i>Low Partial Credit</i> <ul style="list-style-type: none"> • Writes answer of part (i) in answer box of (ii) • Writes $y - y_1 = m(x - x_1)$ or $y = mx + c$ <i>High Partial Credit</i> <ul style="list-style-type: none"> • Evaluates slope using answer of part (i) and some work on equation of line formula

Q5	Model Solution – 30 Marks	Marking Notes
(a) (i)	$\frac{12\ 000}{240} \times 320 = €16\ 000$	Scale 10B (0, 7, 10) <i>Partial Credit</i> <ul style="list-style-type: none"> Work of merit, for example 80 metres or 1/3 or 50, etc <p>Note: Accept correct answer without supporting work for full credit</p>
(a) (ii)	$6 \times 8 = 48$ $\frac{48}{4} = 12 \text{ days}$	Scale 5C (0, 3, 4, 5) <i>Low Partial Credit</i> <ul style="list-style-type: none"> Work of merit, for example $\frac{6+8}{4}$, 6×8, divides by 4 <p>High Partial Credit</p> <ul style="list-style-type: none"> Finds 48 $\frac{6+8}{4} = \frac{14}{4}$ days (or $\frac{6+8}{4} = 3\frac{1}{2}$ days) <p>Note: Accept correct answer without supporting work for full credit</p>
(b) (i)	$\frac{120}{180} \text{ or } \frac{2}{3} \text{ [of an hour]}$	Scale 10B (0, 7, 10) <i>Partial Credit</i> <ul style="list-style-type: none"> Time = $\frac{\text{Distance}}{\text{Speed}}$ <p>Note: Full Credit -1 : 40 minutes OR 0 · 67 Note: Accept correct answer without supporting work.</p>

Q5	Model Solution – 30 Marks	Marking Notes
(b) (ii)	$T_1 = \frac{2}{3}$ $T_2 = \frac{120}{220} = \frac{6}{11}$ $\frac{2(120)}{\frac{2}{3} + \frac{6}{11}} = 198$	<p>Scale 5D (0, 2, 3, 4, 5)</p> <p>4 Steps in solution:</p> <ol style="list-style-type: none"> 1. T1 2. T2 3. Sets up equation 4. Finishes correctly <p><i>Low Partial Credit</i></p> <ul style="list-style-type: none"> • Work of merit, for example, Time = $\frac{\text{Distance}}{\text{Speed}}$, OR $2(120)$ OR writes answer from part (i) into answer box of (ii) <p><i>Mid Partial Credit</i></p> <ul style="list-style-type: none"> • Two parts correct <p><i>High Partial Credit</i></p> <ul style="list-style-type: none"> • Three parts correct

Q6	Model Solution – 30 Marks	Marking Notes
(a) (i)	$\begin{aligned} (-5)^2 + 8(-5) - 6 &= 25 - 40 - 6 \\ &= -21 \end{aligned}$	Scale 5B (0, 3, 5) <i>Partial Credit</i> <ul style="list-style-type: none"> Some correct substitution Note: Accept correct answer without supporting work for full credit
(a) (ii)	$\begin{aligned} 2x + 8 &= 0 \\ x &= -4 \end{aligned}$	Scale 5B (0, 3, 5) <i>Partial Credit</i> <ul style="list-style-type: none"> Work of merit, for example writes dy/dx Note: Zero marks for solving $x^2 + 8x - 6 = 0$
(b)	$\begin{aligned} 4x^2 - 8x - 8x + 16 - 6 \\ 4x^2 - 16x + 10 \end{aligned}$	Scale 10C (0, 4, 6, 10) <i>Low Partial Credit</i> <ul style="list-style-type: none"> One term correct in expansion of $(2x - 4)^2$ Writes $(2x - 4)(2x - 4)$ Ignores twice the product and just writes $4x^2 \mp 16$ for the squaring <i>High Partial Credit</i> <ul style="list-style-type: none"> Writes $4x^2 - 8x - 8x + 16$

Q6	Model Solution – 30 Marks	Marking Notes
(c)	$x = \frac{-6 \mp \sqrt{6^2 - 4(9)(-5)}}{18}$ $x = 0 \cdot 483 \quad \text{and} \quad x = -1 \cdot 149$ $x = 0 \cdot 48 \quad \text{and} \quad x = -1 \cdot 15$	Scale 10C (0, 4, 6, 10) <p>Three steps involved in solution:</p> <ol style="list-style-type: none"> 1. Identifies a, b, and c 2. Fully substituted formula 3. Both correctly evaluated <p><i>Low Partial Credit</i></p> <ul style="list-style-type: none"> • Minus b formula written • Work of merit, for example identifies one of a, b or c <p><i>High Partial Credit</i></p> <ul style="list-style-type: none"> • Two steps correct • Formula fully correctly substituted • Second value not found <p>Note: Apply F* if incorrect or no rounding, once only</p>

Q7	Model Solution – 50 Marks	Marking Notes
(a) (i)	$\frac{1000}{15 + 10} = 40$	Scale 10B (0, 7, 10) <i>Partial Credit</i> <ul style="list-style-type: none"> Work of merit, for example substitutes in the 15 to the given formula or writes $15 + 10$ Note: Apply F* for $\frac{1000}{25}$ Note: Accept correct answer without supporting work for full credit
(a) (ii)	Answer: C decreases Reason: Because the denominator is getting bigger relative to the numerator.	Scale 5B (0, 3, 5) <i>Partial Credit</i> <ul style="list-style-type: none"> Work of merit, for example answer correct (i.e. decreases) or indicates denominator gets bigger
(a) (iii)	$C(S + 10) = 1000$ $CS + 10C = 1000$ $CS = 1000 - 10C$ $S = \frac{1000 - 10C}{C}$ <p style="text-align: center;">Or</p> $S = \frac{1000}{C} - 10$	Scale 5C (0, 3, 4, 5) <i>Low Partial Credit</i> <ul style="list-style-type: none"> One term correct when multiplying across by $(S + 10)$ Writes $C(S + 10)$ <i>High Partial Credit</i> <ul style="list-style-type: none"> $CS = 1000 - 10C$ Note: $S = \frac{1000}{C+10}$ without work is zero marks

Q7	Model Solution – 50 Marks	Marking Notes
(a) (iv)	$S = \frac{1000 - 10(30)}{30} = 23 \cdot 33 \dots$ $S = \frac{1000 - 10(100)}{30} = 0$ <p>S goes from 0 to $23 \cdot 3\dots$</p>	Scale 10C (0, 4, 6, 10) <i>Low Partial Credit</i> <ul style="list-style-type: none"> • Carries answer from part (iii) down • Some correct substitution into $C = \frac{1000}{S + 10}$ <i>High Partial Credit</i> <ul style="list-style-type: none"> • Both formulas fully correctly substituted • One value correct <p>Note: Award F* if both numbers are calculated correctly but no range indicated</p> <p>Note: Accept correct answers, 0 and 23 , without supporting work</p>
(b) (i)	$P(0) = 0 \cdot 3$ $P(24) = 0 \cdot 3 + 0 \cdot 02(24) = 0 \cdot 78$	Scale 10C (0, 4, 6, 10) <i>Low Partial Credit</i> <ul style="list-style-type: none"> • Some correct substitution <i>High Partial Credit</i> <ul style="list-style-type: none"> • One value correct • Both formulas fully substituted <p>Note: Accept correct answers without supporting work for full credit</p>
(b) (ii)	$P'(t) = 0 \cdot 02$ <p>This means that the probability that it is raining in Waterville is increasing at a rate of 2 % every hour.</p>	Scale 5B (0, 3, 5) <i>Partial Credit</i> <ul style="list-style-type: none"> • Work of merit in either $P'(t)$ or in explaining the meaning • Writes dy/dx
(b) (iii)	$0 \cdot 35 + 0 \cdot 02 = 0 \cdot 37$ <p>OR</p> $0 \cdot 3 + 0 \cdot 02t = 0 \cdot 35$ $\Rightarrow t = 2 \cdot 5$ <p>1 hour later $t = 3 \cdot 5$</p> $\Rightarrow 0 \cdot 3 + 0 \cdot 02(3 \cdot 5) = 0 \cdot 37$	Scale 5B (0, 3, 5) <i>Partial Credit</i> <ul style="list-style-type: none"> • Work of merit, for example indicates the probability will be higher

Q8	Model Solution – 50 Marks	Marking Notes
(a)	$50 \times 30 = 1500 \text{ m}^2$	<p>Scale 10B (0, 7, 10)</p> <p><i>Partial Credit</i></p> <ul style="list-style-type: none"> • Work of merit, for example writes area is length multiplied by breadth, or $50 \times$ something <p>Note: Accept correct answer without supporting work for full credit</p> <p>Note: Apply F* if no units or incorrect units</p>
(b)	$A = \frac{3}{2}[0 + 2 + 2(10 + 14 + 12 + 10 + 8)]$ $= 165 \text{ m}^2$	<p>Scale 5C (0, 3, 4, 5))</p> <p><i>Low Partial Credit</i></p> <ul style="list-style-type: none"> • Trapezoidal Rule written • Work of merit on the diagram <p><i>High Partial Credit</i></p> <ul style="list-style-type: none"> • Full correct substitution <p>Note: Apply F* if no units or incorrect units</p>
(c)	Make more divisions Or Measure more accurately	<p>Scale 5B (0, 3, 5)</p> <p><i>Partial Credit</i></p> <ul style="list-style-type: none"> • Work of merit, for example consistent extra vertical lines drawn on diagram

Mathematics

Marking Scheme

Ordinary Level

Paper 2

Structure of the marking scheme

Candidate responses are marked according to different scales, depending on the types of response anticipated. Scales labelled A divide candidate responses into two categories (correct and incorrect). Scales labelled B divide responses into three categories (correct, partially correct, and incorrect), and so on. The scales and the marks that they generate are summarised in this table:

Scale label	A	B	C	D
No of categories	2	3	4	5
5-mark scale		0, 3, 5	0, 3, 4, 5	0, 2, 3, 4, 5
10-mark scale			0, 4, 6, 10	0, 4, 6, 8, 10
15-mark scale			0, 5, 10, 15	0, 5, 8, 12, 15

A general descriptor of each point on each scale is given below. More specific directions in relation to interpreting the scales in the context of each question are given in the scheme, where necessary.

Marking scales – level descriptors

B-scales (three categories)

- response of no substantial merit (no credit)
- partially correct response (partial credit)
- correct response (full credit)

C-scales (four categories)

- response of no substantial merit (no credit)
- response with some merit (low partial credit)
- almost correct response (high partial credit)
- correct response (full credit)

D-scales (five categories)

- response of no substantial merit (no credit)
- response with some merit (low partial credit)
- response about half-right (mid partial credit)
- almost correct response (high partial credit)
- correct response (full credit)

In certain cases, typically involving incorrect rounding, omission of units, a misreading that does not oversimplify the work, or an arithmetical error that does not oversimplify the work, a mark that is one mark below the full-credit mark may also be awarded. Such cases are denoted with a * and this level of credit is referred to as *Full Credit -1*. Thus, for example, in Scale 10C, *Full Credit -1* of 9 marks may be awarded.

The only marks that may be awarded for a question are those on the scale above, or *Full Credit -1*.

A rounding penalty is applied each time it occurs in the scheme. There is no penalty for omitted units if the question specifies the unit to be used in the answer, and there is generally no penalty for an omitted euro symbol in questions involving money.

Throughout the scheme a correct relevant formula written is regarded as Work of merit, award the lowest non-zero level of credit (typically *Partial Credit* or *Low Partial Credit*, as appropriate).

In general, accept a candidate's work in one part of a question for use in subsequent parts of the question, unless this oversimplifies the work involved.

Unless otherwise specified, an answer without sufficient supporting work is generally awarded the lowest non-zero level of credit (typically *Partial Credit* or *Low Partial Credit*, as appropriate).

Summary of mark allocations and scales to be applied

Section A (150)		Section B (150)	
Answer any five questions		Answer any three questions	
Question 1 (30)	Question 4 (30)	Question 7 (50)	Question 9 (50)
(a)(i) 10C	(a)(i) 5C	(a)(i) 10C	(a)(i)(iii) 10C
(a)(ii) 10C	(a)(ii) 10C	(a)(ii) 10C	(a)(ii) 5C
(b) 5C	(a)(iii) 5B	(a)(iii) 10C	(a)(iv) 15C
(c)(i)(ii) 5D	(b) 10C	(a)(iv) 10C	(b)(i) 10C
Question 2 (30)	Question 5 (30)	(b) 5C	(b)(ii) 5C
(a)(i)(ii) 10D	(a)(b) 10D	(c) 5C	(b)(iii) 5D

(b)(i)(ii) 10D	(b) 5C	(c)(i) 5C	(c)(ii) 5C
	(c) 10C	(c)(ii) 5C	(c)(iii) 5C
		(c)(iii) 10D	(d) 10C

Palette of annotations available to examiners

Symbol	Name	Meaning in the body of the work	Meaning when used in the right margin
✓	Tick	Work of relevance	The work presented in the body of the script merits full credit
✗	Cross	Incorrect work (distinct from an error)	The work presented in the body of the script merits 0 credit
*	Star	Rounding / Unit / Arithmetic error Misreading	
~~~~~	Horizontal wavy	Error	
P			The work presented in the body of the script merits partial credit
L			The work presented in the body of the script merits low partial credit
M			The work presented in the body of the script merits mid partial credit
H			The work presented in the body of the script merits high partial credit
F*	F star		The work presented in the body of the script merits Full Credit (- 1)
[	Left Bracket		Another version of this solution is presented elsewhere and it merits equal or higher credit
	Vertical wavy	No work on this page (portion of the page)	
O	Oversimplify	The candidate has oversimplified the work	
wom	Work of Merit	There is some value in the work	

**Note:** Where work of substance is presented in the body of the script, the annotation on the right margin should reflect a combination of annotations in the work

In a **C scale** where * and ~~~~ and ~~~~~ appear in the body of the work, then L should be placed in the right margin.

In the case of a **D scale** with the same annotations, M should be placed in the right margin.

A ✓ in the body of the work may sometimes be used to indicate where a portion of the work presented has value and has merited one of the levels of credit described in the marking scheme. The level of credit is then indicated in the right margin.

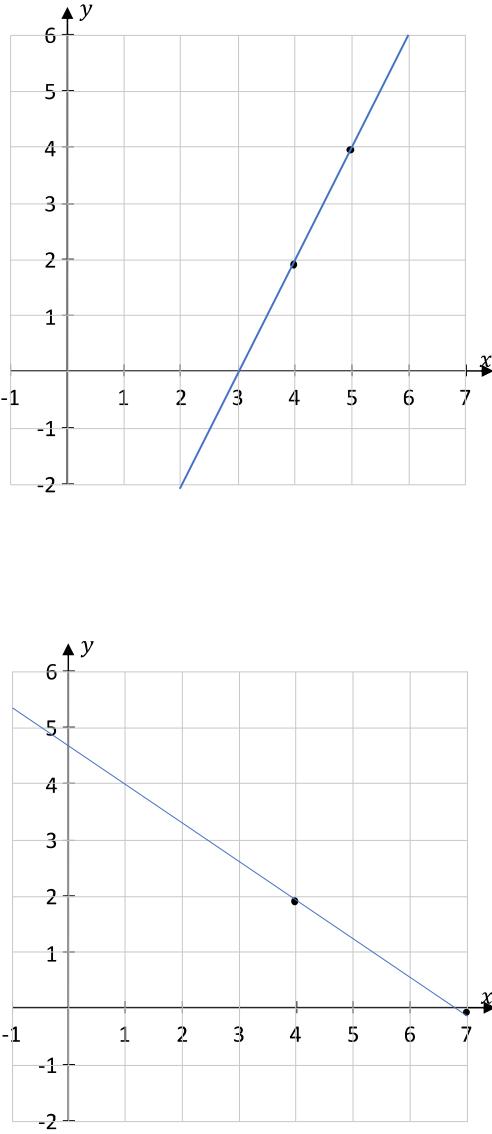

## Detailed marking notes

### Model Solutions & Marking Notes

**Note:** The model solutions for each question are not intended to be exhaustive – there may be other correct solutions. Any Examiner unsure of the validity of the approach adopted by a particular candidate to a particular question should contact his / her Advising Examiner.

<b>Q1</b>	<b>Model Solution – 30 Marks</b>	<b>Marking Notes</b>
